Attn: Jerome Water Customers

During the week of June 20th, 2022 and the week of June 27th, 2022, the Jerome Public Works department will be exercising water main valves near your home or business. Proper distribution system maintenance ensures ease of repairs during an emergency situation.

You may notice a discoloration and possibly some sediment in your water. It is strongly recommended that you run a small amount of water in your bathtub to flush any sediment from your water system. There is no need to boil water or take any other action. Please see the Village of Jerome website for more information flushing your home or business water system.

Only residents and businesses who are Village of Jerome Water customers will be affected.

Thank you for your patience and understanding while we complete this critical maintenance.

Contact the Public Works Department directly with any concerns.

David Wilken
Public Works Supervisor
