Village of Jerome, IL Residents,

RE: **Microsurfacing 2022 Project**

Weather permitting, the street in front of your house will be seal-coated next

MON

TUES.

WED.

THURS.

FRI.

The application, called micro-surfacing, is a thin asphalt and aggregate coating designed to provide a new wearing surface for the street and prolong the service life of the pavement.

Flagmen will be onsite to help direct traffic and no street parking will be allowed on the day of paving. Please do not drive on the fresh material because this may damage the asphalt surface and/or get asphalt on your vehicle. It takes about 3 hours for the material to set and cure. When it is ready for traffic, the cones will be removed and the lanes will be opened again.

Work is performed between 7:00AM and 5:00PM. In the event of rain, work will be re-scheduled for the next dry day. We will not be working on Saturday/Sunday.

Thank you for your cooperation during this street improvement. If you have questions, please contact one of our workers.

Sincerely,

Microsurfacing Contractors, LLC
