

Monitoring Violations Annual Notice Template

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for JEROME 1670600

Our water system violated one drinking water standard over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the period of 4/01/2023 to 06/30/2023 we completed the required testing for Total HAA5 within the timeframe. The State of IL. Laboratory failed to provide the results to the IL EPA Compliance section within the required time. .

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [this contaminant/these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Total HAA5	4	4	04/01/2023-06/30/2023	6/29/2023

What happened? What is being done?

Results from sample taken on 6/29/2023 were not provided by the laboratory within 10 days. Second sample was taken and results submitted.

For more information, please contact David Wilken- Water Operator 2901 Leonard St. Springfield, IL. 62704 217-546-2203

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
